Subject Index—1992

Abstracts, 97
ACE inhibitors, fast protocols for obstruction, renovascular hypertension, 193
Acetazolamide, intervention, Tc-99m HMPAO SPECT brain imaging, 131
Adenosine
dipyridamole and dobutamine, pharmacologic cardiac intervention, 53
intravenous infusion systems, 215
pharmacological stress, SPECT teboroxime scintigraphy, single-headed camera, 121(ab)
Aerosols, measurement of drug distribution, rapid analytical method, 155
Albumin, macroaggregated, Tc-99m, reduction of number of particles, 109(ab), 220
Algorithms, interpolative background subtraction, Tc-99m sestamibi, 102(ab)
Allografts, renal, serial follow-up, low-dose renal scintigraphy, 109(ab)
Alpha-Radiation
delayed cell damage, 93
American College of Nuclear Physicians (ACNP), opposition to record-keeping requirements, 255
Aminophylline, pharmacologic cardiac intervention, adenosine, dipyridamole and dobutamine, 53
Anger -type detectors, quality control in volume imaging, PET, 106(ab)
Angiography, radionuclide
blood pool imaging, bone disease in adults, 120(ab)
dose adjustment, patient physical parameters, 100(ab)
first-pass, mobile multiwire gamma camera, 9
Animal research, thwarting physical attacks on laboratories, 48
Anticoagulant citrate dextrose (ACD)
optimum concentration, preparation of Tc-99m red blood cells, Ultratag RBC kit, 107(ab)
vs. heparin, Tc-99m RBC, 107(ab)
Artery, internal carotid, occlusion, cerebral perfusion and Tc-99m HMPAO, 104(ab)
Aspiration, tracheal, scintigraphic detection, 123(ab)
Attenuation correction, determination of values, varying phantom circumferences, 124(ab)
Attenuator, improved system, dose calibrator linearity testing, 169

Behavior, influence of nuclear medicine managers' style, employees' satisfaction, 88
Bicycle, exercise, myocardial studies, 101(ab)
Bladder, volume of fluid and temperature, nuclear cystograms, 106(ab)
Blood
"arterialized" venous, enhanced technique, PET, 106(ab)
aseptic and safe handling, facilities and equipment, 236
Blood flow, renal, convection diffusion model, transplanted kidney, 109(ab)
Blood pool imaging
gated tomographic, accuracy and reproducibility, ejection fraction calculation, 101(ab)
radionuclide angiogram and, evaluation, bone disease in adults, 120(ab)
Blue Cross/Blue Shield
assessment criteria, 249
no recommended PET coverage, cardiology, 249
PET coverage, neurological indications, 249
Bone
analog vs. digital presentation formats, two-headed whole body gamma camera, 104(ab)
disease in adults, radionuclide angiogram, 120(ab)
malignancy localization, thallium imaging, 107(ab)
scintigraphy, colon visualization, 73
SPECT, volume three-dimensional display, 141
Tc-99m MDP, I-123 spectamine brain scanning, volume and surface rendering, 103(ab)
three-phase radionuclide imaging, hand and wrist pain, 126(ab)
Book reviews
Clinical Practice of Nuclear Medicine, 247
DTC Radiation Safety Videos, Vol 1-Environmental Services; Vol 2-Security, 183
Endocrine Imaging, 182
Imaging of AIDS, 182
Nuclear Medicine: A Teaching File, 247
Radiation Protection and the Internal Emitter Saga, 247
Understanding MRI, 41
Bowel, small, carcinoid tumor, cause of lower gastrointestinal bleeding, 13
Brain
cerebral perfusion, Tc-99m HMPAO, internal carotid artery occlusion, 104(ab)
cerebral perfusion SPECT studies, regional analysis, relative error estimation, 103(ab)
clinical FDG-PET patients, use of image plane count rate, positioning, 122(ab)
death, imaging with Tc-99m HMPAO, 104(ab)
I-123 spectamine, volume and surface rendering, added diagnostic information, 103(ab)
multi-headed SPECT, optimization, reconstruction parameters, 123(ab)
recent advances in radiopharmaceuticals, 135
regional cerebral metabolic function, quantitative measurement, PET, 106(ab)
SPECT
accuracy using differential diagnosis, dementia, 103(ab)
acquisition, improved pallet design, 23
dedicated three-headed camera system, 68
multi-headed imaging, optimization of reconstruction parameters, 123(ab)
Tc-99m HMPAO SPECT
acetazolamide intervention, 131
repeated baseline, technical considerations, 103(ab)

Camera
single-headed, pharmacological stress, SPECT teboroxime scintigraphy, 121(ab)
three-headed, brain SPECT, 68
Carcinoid neoplasms, small bowel, cause of lower gastrointestinal bleeding, 13
Cardiolite, CardioTec and, effects of multiple factors, stability, 84
Cardiology, no recommended PET coverage, Blue Cross/Blue Shield, 249
CardioTec, Tc-99m labeled, effects of multiple factors, stability, 84
Centers for Disease Control (CDC), HIV-infected injection, misadministration leads to lawsuit, 46
Cervical neoplasms, colon visualization, bone scintigraphy, 73
Cholescintigraphy, morphine-augmented, hepatobiliary imaging update, 3
Chromatography
computer-assisted, gamma camera, 80
use of single-strip system, lipophilic component, Tc-99m exametazime preparations, 29
variable radiochemical purity results, commercial Tc-99m sulfur colloid preparation, 40
Clinical Laboratory Improvement Amendments (CLIA), revisions, protests by laboratory personnel, 47
CME credit, physicians to receive credit, technologist program continuing education courses, 96
Collimator, foil, defects, comparison with cast collimators, 18
Colon, visualization, bone scintigraphy, 73
Committee on Allied Health Education and Accreditation (CAHEA), -accredited programs, attrition rates, 187
Computers
-assisted chromatography, gamma camera, 80
bar-code verification system, nuclear pharmacy, 122(ab)
calulation of GFR using Lotus 123, 110(ab)
fulfilling J.C.A.H. Peer Review requirements, rural hospital, 122(ab)
patient protocol and, Tc-99m sestamibi gated SPECT, 120(ab)
technical aspects, first-pass framing program, 121(ab)
Coronary artery disease (CAD), Blue Cross/Blue Shield, no recommended PET coverage, 249
Cyclosporin, concentration, efficiency of Tc-99m radiolabeling, red blood cells, 147
Cystograms, nuclear, volume of fluid instilled into bladder, temperature, 106(ab)

Dementia, differential diagnosis, brain SPECT accuracy, 103(ab)
Department of Energy (DOE), -supplied isotopes, 185
Dipyridamole
adenosine and dobutamine, pharmacologic cardiac intervention, 53
intravenous, Tc-99m teboroxime and, technical tips and pitfalls, 121(ab)
Tl-201 SPECT, time interval from injection, myocardial ischemia, 111(ab)
Disofenin, gluceptate and, preparation of cold-unit doses, 33
Dobutamine
adenosine and dipyridamole, pharmacologic cardiac intervention, 53
pharmacological stress, SPECT teboroxime scintigraphy, single-headed camera, 121(ab)
stress testing, gated planar sestamibi imaging, regional cardiac wall motion, 110(ab)

Dose calibrator
linearity testing, improved attenuator system, 169
modification of vial/syringe holder, 245(le)

Education
consistency of self-study reviews, nuclear medicine technology, 231
physicians to receive CME credit, technologist program continuing education courses, 96
research courses, reliability, multiple instructor grading, 180(le)
Ejection fraction, calculation, accuracy and reproducibility, gated tomographic blood pool images, 101(ab)
Epilepsy, PET, Blue Cross/Blue Shield coverage, 249
Exercise, upright bicycle, myocardial studies, 101(ab)
Extremities, clinically asymptomatic inferior vena cava obstruction, 15

Fluid, volume, nuclear cystograms, bladder and temperature of fluid, 106(ab)
Fluorodeoxyglucose
-PET, use of image plane count, positioning of patients, 122(ab)
recommendation for approval, 249
Food and Drug Administration (FDA), release of HCFA results, 249
Formatters, analog and video, comparison, gray scale characteristics, 62
Free Trade Agreement (FTA), meeting in late June, wording of amendment, 188
Fruit, ripeness, use of MRI, 48

Gallium-67, vs. In-111 leukcotyes, 108(ab)
Gallium-67 citrate, In-111 oxine and Tc-99m HMPAO, infection diagnosis, 108(ab)
Gamma camera
computer-assisted chromatography, 80
mobile multiwire, first-pass radionuclide angiography, 9
performance, point-source scanner, 25
renography, technical aspects, kidney function, 123(ab)
two-headed whole body, analog vs. digital presentation formats, bone scans, 104(ab)
Gastric emptying, in vitro stability, Tc-99m labeled egg formulations, 108(ab)
Gastrointestinal tract, bleeding, carcinoid tumor of the small bowel, 13
Glass, hazardous waste containment method, 95
Glomerular filtration rate, calculation using Lotus 123, 110(ab)
Gluceptate, disofenin and, preparation of cold-unit doses, 33
Goel, Yogendra S., In Memoriam, 248
Gray scale, characteristics, comparison, analog and video formatters, 62

Hand
exposure, PET radiopharmaceuticals, 105(ab)
wrist pain and, three-phase radionuclide bone imaging, 126(ab)
Health Care Financing Administration (HCFA), Medicare coverage, 249
Heart
different SPECT filtering techniques, Tc-99m teboroxime, 126(ab)
dual-headed SPECT system, 101(ab)
endocardial and pericardial abnormalities, washout rate display method, Tl-201 SPECT, 75
measuring cardiac volumes, transaxial and resliced oblique images, Tl-201 SPECT, 105(ab)
pharmacologic intervention, comparison, adenosine/dipyridamole/dobutamine, 53
post-exercise clearance of Tc-99m sestamibi, effect of milk, 101(ab)
radionuclide angiogram dose adjustment, patient physical parameters, 100(ab)
recent advances in radiopharmaceuticals, 135
Tc-99m sestamibi scans, quality, use of milk, 102(ab)
technical aspects, first-pass framing program, 121(ab)
Heating, composition and biodistribution, Re-186 etidronate injection, 123(ab)
Heparin, vs. ACD anticoagulant effect, Tc-99m RBC, 107(ab)
Hepatobiliary system
scintigraphy, number of images in first hour, 121(ab)
update, 3
Hospital, rural, J.C.A.H. Peer Review requirements, 122(ab)
Human immunodeficiency virus, misadministration of radiopharmaceutical leads to lawsuit, 46
Hypertension, renovascular, fast protocols for obstruction, 193

Indium-111 leukocytes, vs. Ga-67, 108(ab)
Indium-111 oxine, Ga-67 and Tc-99m HMPAO, infection diagnosis, 108(ab)
Infection
diagnosis, Ga-67 citrate, In-111 oxine and Tc-99m HMPAO, 108(ab)
In-111 leukocytes vs. Ga-67, 108(ab)
Inferior vena cava, obstruction, clinically asymptomatic, 15
Infusion systems, intravenous, adenosine, 215
In Memoriam: Yogendra S. Goel, 248
In My Opinion, 3, 51, 129, 191
Iodine-123 BMIPP, Tl-201 SPECT and, marker of long-term outcome, acute myocardial infarction, 111(ab)
Iodine-123 spectamine, brain scanning, Tc-99m MDP bone scans, volume and surface rendering, 103(ab)
Iodine-131, metastatic thyroid cancer therapy, visualization, sites of undetected disease, 110(ab)
Ischemia, detection using dipyridamole Tl-201 SPECT, time interval from Tl-201 injection, 111(ab)
Isotopes, DOE-supplied, 185

J.C.A.H. Peer Review, fulfillment of, rural hospital, 122(ab)
Joint Commission on the Accreditation of Healthcare Organizations (JCAHO), survey, improved rating by hospitals, 189

Kidney
allograft, follow-up evaluation, renal scintigraphy, 109(ab)
blood flow quantification, convection diffusion model, transplants, 109(ab)
function, technical aspects, gamma camera renography, 123(ab)
high resolution renal scintigraphy, improved technique, 109(ab)
low-dose scintigraphy, serial follow-up, renal allograft, 109(ab)
plasma clearance calculations, single sample Tc-99m MAG3, 124(ab)
scintigraphy
focal cortical defects, Tc-99m DMSA, 124(ab)
radiation exposure sustained by sonographers, 36
technical aspects of function, gamma camera renography, 123(ab)
transplantation, renal blood flow, convection diffusion model, 109(ab)

Leukocytes, labeling, sedimentation method, 108(ab)
Liver
hepatic count density, Tc-99m teboroxime rest vs. Tc-99m sestamibi rest, 120(ab)
hepatobiliary imaging update, 3
post-exercise clearance of Tc-99m sestamibi, effect of milk, 101(ab)
Low-Level Radioactive Waste Policy Amendments Act (LLRW), Supreme Court ruling, states' rights, 186
Lung
combined quantitative Tc-99m DTPA aerosol, Tc-99m MAA perfusion imaging, 108(ab)
ventilation aerosol procedures, air and surface contamination, 151
ventilation studies, surface contamination, Tc-99m DTPA aerosol, 228

MAG_3, Tc-99m labeled, effects of multiple factors, stability, 84
Malignancy, bone, localization, thallium imaging, 107(ab)
Manpower Survey Report, 250
Medicare, selected PET studies, 249
Mercy Hospital, misadministration of radiopharmaceutical leads to lawsuit, 46
Message from the President, 2, 52, 130, 192
Metastasis, thyroid cancer therapy, I-131, sites of undetected disease, 110(ab)
Microwave
preparation of Tc-99m sulfur colloid, 159
Tc-99m sestamibi, temperature reduction, 180(le)
Milk
post-exercise hepatic and cardiac clearance, Tc-99m sestamibi, 101(ab)
quality of cardiac Tc-99m sestamibi tomographic scans, 102(ab)
Morphine, augmented cholescintigraphy, hepatobiliary imaging update, 3
Myocardial infarction
acute, marker of long-term outcome, Tl-201 and I-123 BMIPP SPECT, 111(ab)
at rest, Tc-99m sestamibi compared to Tl-201, 102(ab)
Myocardial ischemia, dipyridamole Tl-201 SPECT, time interval from injection, 111(ab)
Myocardium
count density with Tc-99m sestamibi, stress imaging times, 120(ab)
perfusion abnormalities, gated sestamibi tomography, 100(ab)
perfusion imaging using Tc-99m SPECT, acquisition parameters, regional photopenic defects, 111(ab)
perfusion scintigraphy, simultaneous dual isotope, 111(ab)
rest/stress Tc-99m sestamibi tomography, attenuation, prone vs. supine positioning, 105(ab)
upright bicycle exercise, 101(ab)

NaI well-counter, counting efficiency, minimum detectable activity, 104(ab)
National Institutes of Health (NIH), PET scanners, quality control, 122(ab)
National Biomedical Tracer Facility (NBTF), 253
Neurology, PET coverage, Blue Cross/Blue Shield, 249
NMTCB, 42, 92, 173, 184, 248

Nordion, strike narrowly averted, 185
Nuclear magnetic resonance, measurement of fruit ripeness, 48
Nuclear medicine
counting efficiency, minimum detectable activity, NaI well-counter, 104(ab)
influence of managers' style, employees' satisfaction, 88
reliability of multiple instructor grading, research course, 180(le)
Nuclear medicine technology
accredited educational program, 246(le)
career ladder concept, professional development, staff retention, 242
coming of age, 191
consistency of self-study reviews, directors, Joint Review Committee on Educational Programs, 231
misadministration of radiopharmaceutical leads to lawsuit, 46
Nuclear Medicine Technology Program, predictors of success, 177
Nuclear Medicine Week
poster, 49
European celebration, 253
Nuclear Regulatory Commission (NRC)
deletion of record-keeping requirements, deviations from manufacturer's instructions, 255
dose calibrator linearity testing, improved attenuator system, 169
human factors in medical misadministrations, 47
withdraws training criteria proposal, 255
Nuclear waste
hazardous waste containment method, vitrification, 95
transmutation, 44

Office of Health Technology Assessment (OHTA), Medicare coverage, 249

Pallet, improved design, brain SPECT acquisition, 23
Pediatric patients
scintigraphic detection, tracheal aspiration, 123(ab)
vesicoureteral reflux, 126(ab)
Personnel, influence of nuclear medicine managers' style, employees' satisfaction, 88
Phantom
measurement of residual urine volume, 110(ab)
varying circumferences, determination, attenuation correction values, 124(ab)
Pharmacy, nuclear, utilization, bar-code verification system, 122(ab)
Physical size, radionuclide angiogram dose adjustment, 100(ab)
Positioning, prone vs. supine, attenuation, rest/stress Tc-99m sestamibi myocardial tomography, 105(ab)
Positron emission tomography (PET)
Blue Cross/Blue Shield coverage
neurological indications, 249
no recommendation for cardiology, 249
enhanced technique, "arterialized" venous blood, 106(ab)
FDG, use of image plane count, positioning of patients, 122(ab)
NIH scanners, quality control, 122(ab)
quality assurance, routine data acquisitions, 106(ab)
quality control in volume imaging, Anger-type detectors, 106(ab)
quantitation, considerations, use of automated well counters, 163
radiopharmaceuticals, reduction of hand exposures, 105(ab)
Rb-82, intra- and interobserver variability, 101(ab)
regional cerebral metabolic function, technical considerations, quantitative measurement, 106(ab)
routine data acquisition, quality assurance, 106(ab)
selected studies, Medicare coverage, 249
Pyrophosphate, cold, advantages of using Ultratag RBC kits, 107(ab)

Quality assurance, PET, routine data acquisition, 106(ab)
Quality control
NIH PET scanners, 122(ab)
validation, Tc-99m HMPAO, 124(ab)
volume imaging PET scanner, anger-type detectors, 106(ab)

Radiation
exposure sustained by sonographers, renal scintigraphy, 36
-induced damage, not immediately apparent, 93
Radioactivity, total absence of, criteria for detection, 105(ab)
Radioaerosol, lung ventilation aerosol procedures, air and surface contamination, 151
Radioimmunoassay, accredited educational program, nuclear medicine technologist, 246(le)
Radionuclide, angiogram dose adjustment, patient physical parameters, 100(ab)
Radiopharmaceuticals
early history, landmarks and landmines, 209
misadministrations
human factors, study by NRC, 47
leading to lawsuit, 46
nuclear pharmacy, utilization, bar-code verification system, 122(ab)
PET, reduction of hand exposures, 105(ab)
recent advances, 135
Tc-99m labeled, stability, multiple factors, 84
Reconstruction, parameters, multi-headed brain SPECT imaging, 123(ab)
Reflux, vesicoureteral, pediatric patients, 126(ab)
Regional wall motion, gated planar sestamibi imaging, dobutamine stress testing, 110(ab)
Renography
diuretic, fast protocols, renovascular hypertension, 193
gamma camera, technical aspects, kidney function, 123(ab)
Rhenium-186 etidronate, composition and biodistribution, effects of heating, 123(ab)
Rim sign, hepatobiliary imaging update, 3
Rubidium-82, PET, intra- and interobserver variability, 101(ab)

Scintigraphy
bone, colon visualization, 73
detection of tracheal aspiration, children, 123(ab)
DMSA renal, focal cortical defects, 124(ab)
hepatobiliary, number of images in first hour, 121(ab)
high-resolution renal, 109(ab)
low-dose renal, serial follow-up, renal allograft, 109(ab)
myocardial perfusion, simultaneous dual isotope, 111(ab)
renal
high resolution, improved technique, 109(ab)
radiation exposure sustained by sonographers, 36
simultaneous dual isotope myocardial perfusion, 111(ab)
Tc-99m teboroxime SPECT, pharmacological stress, single-headed camera, 121(ab)
total absence of radioactivity, criteria for detection, 105(ab)
Sedimentation method, leukocyte labeling, 108(ab)
Sestamibi, gated tomography, detection, myocardial perfusion abnormalities, 100(ab)
Single photon emission computed tomography (SPECT)
bone, volume three-dimensional display, 141
brain
dedicated three-headed camera system, 68
differential diagnosis, patients with dementia, 103(ab)
improved pallet design, 23
cerebral perfusion, regional analysis, relative error estimation, 103(ab)
dual-headed, cardiac applications, 101(ab)
filtering techniques, Tc-99m teboroxime cardiac images, 126(ab)
gated sestamibi tomography, detection, myocardial perfusion abnormalities, 100(ab)
multi-headed, reconstruction parameters, brain, 123(ab)
Tc-99m, myocardial perfusion imaging, acquisition parameters, 111(ab)
Tc-99m HMPAO
acetazolamide intervention, brain imaging, 131
brain, repeated baseline, 103(ab)
Tc-99m sestamibi, rest/stress, inter- and intraobserver variability, 102(ab)
Tc-99m sestamibi gated, patient protocol, computer methods, 120(ab)
Tc-99m teboroxime
filtering techniques, cardiac images, 126(ab)
scintigraphy, pharmacological stress, 121(ab)
Tl-201
detection of ischemia, time interval from Tl-201 injection, 111(ab)
transaxial and resliced oblique images, measuring cardiac volumes, 105(ab)
washout rate display method, endocardial and pericardial abnormalities, 75
Tl-201 and I-123 BMIPP, marker of long-term outcome, acute myocardial infarction, 111(ab)
64 vs. 32 projection, Tc-99m sestamibi, 103(ab)
Society of Nuclear Medicine (SNM)
new way to order books, 96
1991 Nuclear Medicine Week Media Stars Contest, 189
Office of Health Care Policy, 254
opposition to record-keeping requirements, 255
-TS Public Education and Professional Enhancement Committee, formation of subcommittees, education of general public, 187
technologist section program: 39th annual meeting, 97
SNM Manpower Survey Report, 250
SPECTamine, correct expiration time, distribution method, 40(le)
Stannous-pyrophosphate, efficiency of radiolabeling, Tc-99m red blood cells, cyclosporin concentration, 147
Supreme Court, ruling on LLRW, upholding of states' rights, 186
Syringe, holder modifications, dose calibrator, 245(le)

Technetium-99m
egg formulations, *in vitro* stability, gastric emptying time, 108(ab)
labeled radiopharmaceuticals, effects of multiple factors, stability, 84
macroaggregated albumin injection
improved method, reduced particle number, 109(ab)
reduction of number of particles, 220
SPECT, myocardial perfusion imaging, acquisition parameters, 111(ab)
Technetium-99m DMSA, renal scintigraphy, focal cortical defects, 124(ab)
Technetium-99m DTPA
aerosol
lung ventilation studies, surface contamination, 228
Tc-99m MAA perfusion lung imaging and, methodology, 108(ab)
measurement of drug distribution in aerosols, rapid analytical method, 155
Technetium-99m exametazime, lipophilic component, use, single-strip chromatography system, 29
Technetium-99m HMPAO
brain death imaging, 104(ab)
cerebral perfusion, internal carotid artery occlusion, 104(ab)
Ga-67 citrate and In-111 oxine, infection diagnosis, 108(ab)
-labeled white blood cells, elution analysis, normal biodistribution, 224
SPECT
acetazolamide intervention, brain imaging, 131
brain scans, repeated baseline, 103(ab)
validation of quality control methods, 124(ab)
Technetium-99m MAA, perfusion lung imaging, Tc-99m DTPA aerosol and, methodology, 108(ab)
Technetium-99m MAG_3, single sample, renal plasma clearance calculations, 124(ab)
Technetium-99m MDP, bone and I-123 spectamine brain scanning, volume and surface rendering, 103(ab)
Technetium-99m red blood cells
efficiency of radiolabeling, cyclosporin concentration, 147
heparin vs. ACD anticoagulant effect, 107(ab)
preparation of Ultratag, optimum concentration, ACD, 107(ab)
Technetium-99m sestamibi
gated planar sestamibi imaging, regional cardiac wall motion, dobutamine stress testing, 110(ab)
gated SPECT, patient protocol, computer methods, 120(ab)
identification of myocardial infarction at rest, better than Tl-201, 102(ab)
interpolative background subtraction algorithm, 102(ab)
microwaved, temperature reduction, 180(le)
myocardial count density, stress imaging, 120(ab)
myocardial infarction at rest, compared to Tl-201, 102(ab)
myocardial tomography, attenuation, prone vs. supine positioning, 105(ab)
post-exercise clearance, effect of milk, heart and liver, 101(ab)
preparation parameters, 123(ab)
quality of tomographic scans, use of milk, 102(ab)
rest/stress same day SPECT myocardial tomograms, inter- and intraoberver variability, 102(ab)
rest vs. Tc-99m teboroxime rest, hepatic count density, 120(ab)
Tl-201 and, dual isotope imaging, 111(ab)
64 vs. 32 projection SPECT, 103(ab)
Technetium-99m sulfur colloid
commercial preparation, variable radiochemical purity results, chromatography, 40
microwaved preparation, 159
Technetium-99m tebo
cardiac images, SPECT filtering techniques, 126(ab)
intravenous dipyridamole and, technical tips, clinical pitfalls, 121(ab)
rest vs. Tc-99m sestamibi stress, hepatic count density, 120(ab)
SPECT, filtering techniques, cardiac images, 126(ab)
SPECT scintigraphy, pharmacological stress, single-headed camera, 121(ab)
Technologist News, 44, 93, 185, 249
Temperature, volume of fluid instilled into bladder, nuclear cystograms, 106(ab)
Thallium-201
bone malignancy localization, 107(ab)
compared to Tc-99m sestamibi, identification, myocardial infarction at rest, 102(ab)
I-123 BMIPP and, marker of long-term outcome, acute myocardial infarction, 111(ab)
SPECT
detection of ischemia, time interval from Tl-201 injection, 111(ab)
I-123 BMIPP, outcome of acute myocardial infarction, 111(ab)
time from dipyridamole injection, myocardial ischemia, 111(ab)
transaxial and resliced oblique images, measuring cardiac volumes, 105(ab)
washout rate display method, endocardial and pericardial abnormalities, 75
stress, acceptable limits, background subtraction values, 124(ab)
Tc-99m sestamibi and, dual isotope imaging, 111(ab)
Thyroid, $NaTcO_4$ imaging, patient comfort, 121(ab)
Thyroid neoplasms, metastatic, I-131 therapy, sites of undetected disease, 110(ab)
Title VII appropriations, 255
Trachea, scintigraphic detection of aspiration, 123(ab)
Transmutation, nuclear waste, 44
Transplantation, renal, blood flow quantification and function, convection diffusion model, 109(ab)

Ultrasonography, radiation exposure sustained by sonographers, renal scintigraphy, 36
Ultratag RBC kit
advantages compared to cold pyrophosphate labeling, 107(ab)
preparation of Tc-99m red blood cells, optimum concentration of ACD, 107(ab)
United States-Canada Free Trade Agreement, meeting in late June, wording of amendment, 188
Urine, measurement of residual volume, phantom study, anterior and geometric mean counts, 110(ab)

Venous system, clinically asymptomatic inferior vena cava obstruction, 15
Ventilation, aerosol procedures, air and surface contamination, lung, 151
Ventriculography, technical aspects, first-pass framing program, 121(ab)
Vitrification, hazardous waste containment method, 95
VOICE, form on back page of issue, CE Tests Answer Sheet, 188

Well counter, automated, PET quantitation, 163
White blood cells, Tc-99m HMPAO-labeled, elution analysis, normal biodistribution, 224
Wrist, hand pain and, three-phase radionuclide bone imaging, 126(ab)
X-Radiation
delayed mutation in cells, 93
